REVIEW STATUS: CLINICIAN APPROVED Screening date: 11 Nov 2026, 15:43 IST

Synthetic test patient. This report was produced with artificially generated data for software testing and has no clinical meaning.

Patient information

Patient name	**SYNTHETIC Acceptance Test**	Patient ID	**NR-AEH-000004**
Date of birth / Age	**12 Apr 1966 · 60 y**	Sex	**Unspecified**
Diabetes	**Yes**	Hypertension	**No**
Screening ID	**SC-AEH-20261111-00001**	Camera	**Demo fundus camera**
Pupil dilation	**Not recorded**	Report generated by	**Dr. Ananya Sen (DEMO)**

Retinal photographs

OD — Right eye

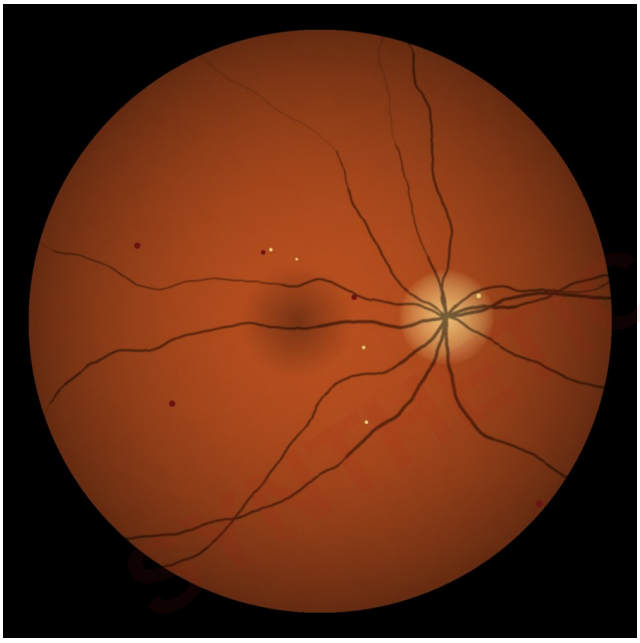

Image quality: **ACCEPTABLE**
Image quality is acceptable for AI-assisted screening.
1400×1400px · SYNTHETIC_right.png · SHA-256 95ba27ec7569…

OS — Left eye

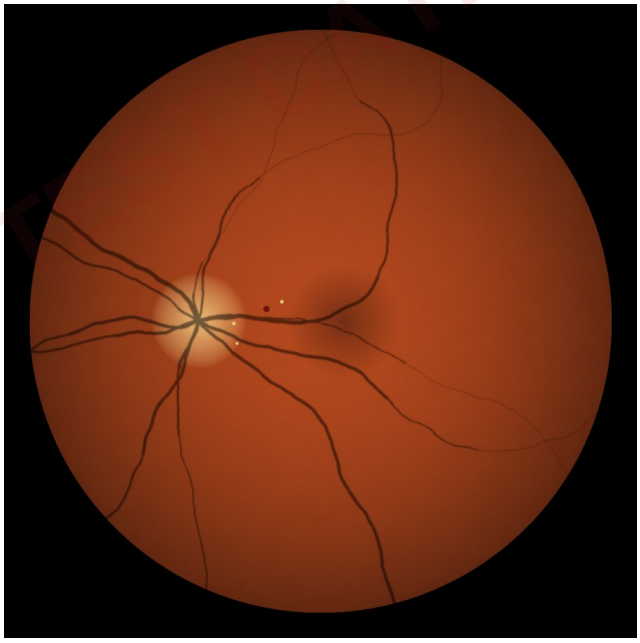

Image quality: **ACCEPTABLE**
Image quality is acceptable for AI-assisted screening.
1400×1400px · SYNTHETIC_left.png · SHA-256 595c37a92e8c…

AI screening output (unmodified model output)

Eye	AI result	Confidence	Model
Right	**AI MODEL NOT AVAILABLE — HUMAN REVIEW REQUIRED** No AI result was produced. No trained model has been registered. Run the training pipeline with a licensed, labelled dataset.	—	— v—
Left	**AI MODEL NOT AVAILABLE — HUMAN REVIEW REQUIRED** No AI result was produced. No trained model has been registered. Run the training pipeline with a licensed, labelled dataset.	—	— v—

AI outputs are produced by a model that has not been clinically validated. Confidence values are temperature-calibrated model probabilities, not the probability of disease. Uncertain or unsupported cases are reported as INCONCLUSIVE — HUMAN REVIEW REQUIRED.

Clinician interpretation

Eye	Final grade (clinician)	Decision on AI output	Observations
Right	**Moderate NPDR**	No AI finding available	—
Left	**No apparent diabetic retinopathy**	No AI finding available	—

Clinician-approved recommendations
SYNTHETIC TEST — refer to retina clinic for evaluation.

Referral: Referral recommended (routine)
Next screening: in 12 month(s)
